

Michael Dowd

THANK GOD FOR EVOLUTION

How the Marriage of Science and Religion Will Transform Your Life and Our World

Sunday, June 7, 2009

The Reverend Michael Dowd's passion is showing how understanding "our brain's creation story" via evolutionary psychology and evolutionary brain science can inspire each of us to live with greater integrity, and can inspire all of us to work together toward a thriving future for planet Earth and the body of life of which we are part. His book has been endorsed by 5 Nobel laureates. He and his wife, Connie Barlow, launched their ministry in 2002.

Day Language

Night Language

How can the 14 billion year history of the universe, as given by mainstream science, be understood in God-glorifying, Christ-edifying, scripture-honoring ways?

How can evolutionary brain science and evolutionary psychology deepen our understanding of our faith?
